Optics and Laser Technology

Index to Volume 5

Titles of articles, research notes, and letters to the editor

Automatic recording transmissometer for atmospheric attenuation measurements at 0.9 μm wavelength *R. Sanders* 126

Binary processes in holographic memories and application to the calculation of capacity *M. Jeudy* 253

Compensation of plot distortions in digital plotting systems *A. F. Fercher, P. Skalicky, J. Tomiser* 75

Continuous recording of ultrasonic velocity by laser Bragg diffraction *S. Ito, K. Yoneda, T. Okura, S. Hattori* 221

Dye laser with a transverse-flow cuvette, A *H. Gerlach, H. Scharf* 162

Fringe order determination and zero motion fringe identification in holographic displacement measurements *U. Kopf* 111

Glass ceramics – a laser host material *G. Müller, N. Neuroth* 106

Graphs for the design of laser mirrors at normal incidence *H. F. Mahlein* 60

Holographic control of surface modifications *P. Cannistraci, P. Migliardo, F. Wanderlingh* 210

Holographic photo-elasticity: independent observation of the isochromatic and isopachic fringes for a single model subjected to only one process *B. Chatelain* 201

Importance of coherence of coupling when viewing through visual aids, The *I. Overington* 216

Improved optical images using a multilevel display system for non-optical hologram distributions *A. Whitaker, A. Anderson* 28

Laser Doppler velocimeter with optical frequency shifting *J. Oldengarm, A. H. van Krieken, H. J. Raterink* 249

Lasers as tools for oncology *R. E. Kavetsky, N. F. Gamaleja* 176

Moiré gauging by projected interference fringes *J. Shamir* 78

Moiré gauging by projected interference fringes *S. Yokozeki* 229

On the use of the term 'biocular' *M. H. Freeman* 266

Optical applications of ion beam machining *A. R. Bayly, P. D. Townsend* 205

Optical design for a laser flow meter *R. Manning* 114

Particle detection and shape discrimination using a double pulse laser *A. Ross* 13

Particle timing laser velocity meter, A *L. H. Tanner* 108

Printing of part numbers using a high power laser beam *G. Holzinger, K. Kosanke, W. Menz* 256

Profile formation in holographic diffraction gratings *R. C. McPhedran, I. J. Wilson, M. D. Waterworth* 166

Pulsed interferometric holography of laser-induced air breakdown *A. H. Guenther, W. K. Pendleton, C. Smith, C. H. Skeen, Z. Zivi* 20

Real-time observation of in-plane displacements of opaque surfaces *N. Wadsworth, M. Marchant, B. Billing* 119

Reference fringes in holographic interferometry *F. P. Küpper, C. A. van Dijk* 69

Reflected light microscopy of moving objects *L. Mörkrid, W. C. Olsen* 14

Reversible holographic recording materials for optical information storage *M. R. Tubbs* 155

Simplified interpretation of interference fringes obtained by time average holography *H. Bjelkhagen* 172

Spatial filtering technique for improved holographic character recognition, A *H. Pursey* 24

Studies in laser safety of new high-output systems: 1. Picosecond impacts *L. Goldman, D. Fradin, N. Bloembergen, D. Richfield* 11

Studies in laser safety of new high-output systems: 2. TEA CO_2 laser impacts *L. Goldman, E. Yablonovitch, N. Bloembergen, D. Richfield* 58

Three-beam interferometer for studying small optical path differences, A *S. A. Åfsenius, S. E. Gustafsson* 124

Authors of articles, research notes, and letters to the editor

Åfsenius, S. A., Gustafsson, S. E. A three-beam interferometer for studying small optical path differences 124
